

SMART SOLUTIONS FOR THE WHOLE VALUE CHAIN

 Mining Finland

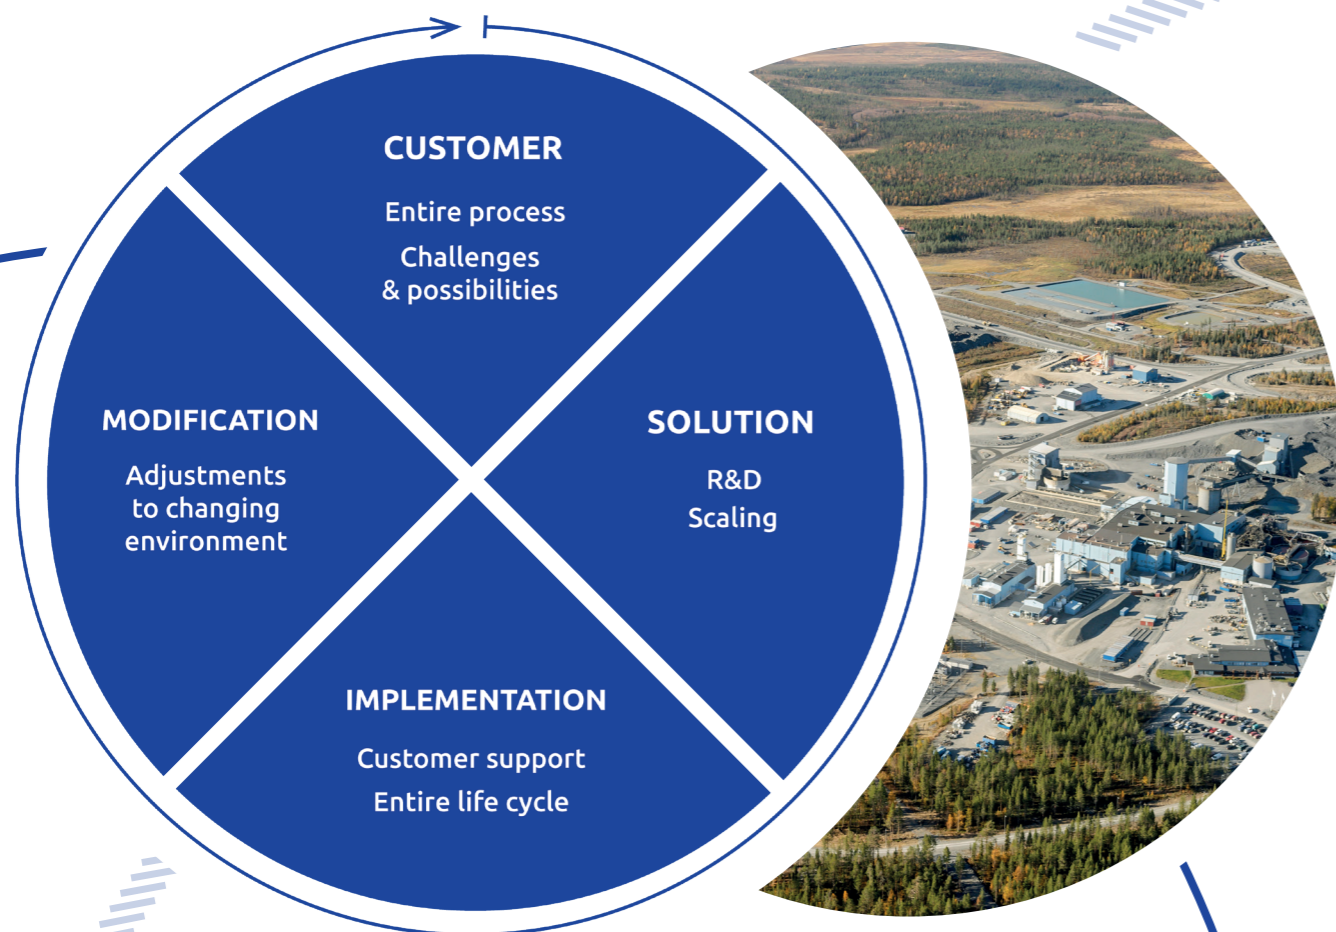

Full range of mining services for you

As an operator in the mining industry, you will find all the services you need in one place. Finland offers a full research and industry ecosystem in the mineral value chain. The state and research institutes together with companies offering machines, equipment and services develop a more responsible mining sector. Finnish government strongly supports research organizations and private companies in developing green and responsible mining technologies, aiming towards zero-waste-mining.

Finland offers a full research and industry ecosystem in the mineral value chain:

- Research power of more than ten mining related universities and research organizations
- Expertise of more than 200 mining technology and service providers
- Operating environment with more than 40 mines, 10 smelters and steel mills.

The Finnish Way in Mining Sector Services TOGETHER WITH THE CUSTOMER

SOLUTIONS FOR THE ENTIRE VALUE CHAIN

Mining Finland opens the doors

We at Mining Finland are committed to promote mining cluster, mining technology and services. We also facilitate R&D and educational collaboration projects in the mining sector. Mining Finland is a non-profit association funded by our members.

Mining Finland network of over 80 members includes:

- Startups and large companies
- Private technology and service companies
- Junior mining companies
- Universities and research organizations
- Regional development companies
